RESEARCH PLAN

LOCATION

The research Project will be carried out at the [redacted] B

At the present time there are one hundred and forty-two (142) non-psychotics classified as criminal-sexual psychopaths. There are four full-time psychiatrists and varying numbers of medical interns; two psychologists; four social workers; nurses and attendants. The superintendent of the Hospital is [redacted] a witting member C of the research team. The institution comes under the direction of [redacted]

any research project is normally approved by the [redacted] B will secure this approval. [redacted] will make space available and it is possible for the research team to sleep at the Hospital while carrying out their investigation.

SUBJECTS

The subjects will be selected from the one hundred and forty-two (142) criminal-sexual psychopaths on whom there is an adequate previous investigation including police reports, physical, psychiatric and psychologic examinations and social histories. The age range of the

[redacted]

[redacted]

subjects varies from twenty to seventy years and there is a wide variation of intelligence levels and social backgrounds.

INVESTIGATORS

The following men are suggested for the research team:

[redacted]

[redacted]

[redacted]

[redacted] has suggested one of the psychiatrists from his staff who is interested and has used drugs in the treatment of patients and has also used hypnosis with mental patients. The research assistants have not been selected as yet but might well include psychologists or medics now attached to [redacted]. The secretary will [redacted] present secretary who will do all the necessary stenographic work in addition to her present duties.

EXPERIMENTAL DESIGN:

Three teams of two senior professional men each will be selected. One team working with the selected group of patients will use straight interrogation, hypnosis and hypnosis and LSD and hypnosis and a

 [redacted]

[redacted]

tetrahydrocannabinol acetate derivative. Another team working on another group of subjects will use straight interrogation, LSD with interrogation and a tetrahydrocannabinol acetate derivative and interrogation. Later, the third team with another group of subjects will use straight interrogation and a combination of LSD and a tetrahydrocannabinol acetate derivative.

A meeting of all the members of the research project will be briefed on the drugs to be used and all of the pharmacological and medical knowledge gained so far in the use of these drugs.

In selecting groups of subjects for experimentation, the following objectives will be sought:

1) Subjects will be selected who have denied allegations of various kinds that can be checked or strongly assumed on the basis of previously established records.

2) As far as possible, the actual research man administering drugs will not be aware of the drug he is administering and placebos will be interspersed with drug administration.

3) Precautions will be taken to neutralize age, intelligence, physical condition, social background and any other controllable factor in selecting groups. Administration of drugs will be done both openly and surreptitiously.

4) Sound recordings will be made of the interrogation and written reports will be obtained in other cases.

[redacted]

5) Due care will be exercised in equating methods of interrogation as far as this can be done. The results of interrogation with drugs and other techniques will be checked against existing records and qualitative and quantitative reports will be evaluated. Accurate and uniform reports will be kept and reports will be submitted on the basis of interim progress and complete projects.
